## WHO CLOSES YOUR FILE

### One dedicated officer

The same person owns each file from title order to funding. Your processor has one name and one direct line.

### Answers in hours

Replies in under two hours during business hours; orders confirmed within one business day. No bots, no offshore call centers.

### Nothing hidden

Live milestones show exactly who each file is waiting on — clear-to-close doesn't slip quietly.

Title ordered — Search complete — **Clearing to close** — Docs & signing — Funded & recorded

Live on every file — your whole pipeline in one view.

## WHY IT COSTS LESS

### We automated the paperwork — not the people.

Software handles the search, document prep, and processing that traditional title companies bill as separate fees — so that layer of the bill is gone, not discounted. A licensed closing officer still reviews and closes every file. Lower fees are the price, not a promotion.

Service and underwriter availability vary by state and transaction, subject to applicable licensing and lender requirements. Coverage is governed by the issued title insurance policy.
